**The Birth of Head Start** Maris A. Vinovskis, 2008-11-15 One of the most popular and enduring legacies of President Lyndon B. Johnson's Great Society programs, Project Head Start continues to support young children of low-income families—close to one million annually—by providing a range of developmental and educational services. Yet as Head Start reaches its fortieth anniversary, debates over the function and scope of this federal program persist. Although the program's importance is unquestioned across party lines, the direction of its future—whether toward a greater focus on school readiness and literacy or the continuation of a holistic approach—remains a point of contention. Policymakers proposing to reform Head Start often invoke its origins to justify their position, but until now no comprehensive political history of the program has existed. Maris A. Vinovskis here provides an in-depth look at the nation's largest and best known—yet politically challenged—early education program. *The Birth of Head Start* sets the record straight on the program's intended aims, documenting key decisions made during its formative years. While previous accounts of Head Start have neglected the contributions of important participants such as federal education officials and members of Congress, Vinovskis's history is the first to consider the relationship between politics and policymaking and how this interaction has shaped the program. This thorough and incisive book will be essential for policymakers and legislators interested in prekindergarten education and will inform future discussions on early intervention services for disadvantaged children.

**RNA Turnover in Eukaryotes: Analysis of Specialized and Quality Control RNA Decay Pathways** Lynne E. Maquat, Megerditch Kiledjian, 2011-09-02 Specific complexes of protein and RNA carry out many essential biological functions, including RNA processing, RNA turnover, and RNA folding, as well as the translation of genetic information from mRNA into protein sequences. Messenger RNA (mRNA) decay is now emerging as an important control point and a major contributor to gene expression. Continuing identification of the protein factors and cofactors and mRNA instability elements responsible for mRNA decay allow researchers to build a comprehensive picture of the highly orchestrated processes involved in mRNA decay and its regulation. \* Covers the nonsense-mediated mRNA decay (NMD) or mRNA surveillance pathway \* Expert researchers introduce the most advanced technologies and techniques \* Offers step-by-step lab instructions, including necessary equipment and reagents

**How Civil Wars Start** Barbara F. Walter, 2023-04-25 NEW YORK TIMES BESTSELLER • A leading political scientist examines the dramatic rise in violent extremism around the globe and sounds the alarm on the increasing likelihood of a second civil war in the United States “Required reading for anyone invested in preserving our 246-year experiment in self-government.”—The New York Times Book Review (Editors’ Choice) WINNER OF THE GLOBAL POLICY INSTITUTE AWARD • THE SUNDAY TIMES BOOK OF THE YEAR • ONE OF THE BEST BOOKS OF THE YEAR: Financial Times, The Times (UK), Esquire, Prospect (UK) Political violence rips apart several towns in southwest Texas. A far-right militia plots to kidnap the governor of Michigan and try her for treason. An armed mob of Trump supporters and conspiracy theorists storms the U.S. Capitol. Are these isolated incidents? Or is this the start of something bigger? Barbara F. Walter has spent her career studying civil conflict in places like Iraq, Ukraine, and Sri Lanka, but now she has become increasingly worried about her own country. Perhaps surprisingly, both autocracies and healthy democracies are largely immune from civil war; it’s the countries in the middle ground that are most vulnerable. And this is where more and more countries, including the United States, are finding themselves today. Over the last two decades, the number of active civil wars around the world has almost doubled. Walter reveals the warning signs—where wars tend to start, who initiates them, what triggers them—and why some countries tip over into conflict while others remain stable. Drawing on the latest international research and lessons from over twenty countries, Walter identifies the crucial risk factors, from democratic backsliding to factionalization and the politics of resentment. A civil war today won’t look like America in the 1860s, Russia in the 1920s, or Spain in the 1930s. It will begin with sporadic acts of violence and terror, accelerated by social media. It will sneak up on us and leave us wondering how we could have been so blind. In this urgent and insightful book, Walter redefines civil war for a new age, providing the framework we need to confront the danger we now face—and the knowledge to stop it before it’s too late.
