Christine Landfried

Judicial Power Christine Landfried, 2019-02-07 Explores the relationship between the legitimacy, the efficacy, and the decision-making of national and transnational constitutional courts.

Constitutionalism and the Rule of Law Maurice Adams, Anne Meuwese, Ernst Hirsch Ballin, 2017-02-02 Rule of law and constitutionalist ideals are understood by many, if not most, as necessary to create a just political order. Defying the traditional division between normative and positive theoretical approaches, this book explores how political reality on the one hand, and constitutional ideals on the other, mutually inform and influence each other. Seventeen chapters from leading international scholars cover a diverse range of topics and case studies to test the hypothesis that the best normative theories, including those regarding the role of constitutions, constitutionalism and the rule of law, conceive of the ideal and the real as mutually regulating.

The President and Immigration Law Adam Cox, Cristina M. Rodríguez, 2020 When President Barack Obama announced his plans to shield millions of immigrants from deportation, Congress and the commentariat pilloried him for acting unilaterally. When President Donald Trump attempted to ban immigration from six predominantly Muslim countries, a different collection of critics attacked the action as tyrannical. Beneath this polarized political resistance lies a widely shared belief: that Congress, not the President, makes our immigration policies, dictating who can come to the United States, and who can stay, in a detailed and comprehensive legislative code. In *The President and Immigration Law*, Adam Cox and Cristina Rodríguez shatter the myth that Congress controls immigration policy. Drawing on a wide range of sources—rich historical materials, unique data on immigration enforcement, and insider accounts of our nation's massive immigration bureaucracy—they tell the story of how the President became our immigration policymaker-in-chief over the course of two centuries. From founding-era debates over the Alien and Sedition Acts to Jimmy Carter's intervention during the Mariel boatlift from Cuba, presidential crisis management has played an important role in this story. Far more foundational, however, has been the ordinary executive obligation to enforce the law. Over time, the power born of that duty has become the central vehicle for making immigration policy in the United States. A pathbreaking account of the President's relationship to Congress, Cox and Rodríguez's analysis helps us better understand how the United States ended up running an enormous shadow immigration system—one in which nearly half of all noncitizens living in America are here in violation of the law. It also provides a blueprint

for reform, one that accepts rather than laments the role the President plays in shaping the national community, while outlining strategies to curb the abuse of law enforcement authority in immigration and beyond.

Constitutional Democracy in Crisis? Mark A. Graber,Sanford Levinson,Mark Tushnet,2018-08-23 Is the world facing a serious threat to the protection of constitutional democracy? There is a genuine debate about the meaning of the various

political events that have, for many scholars and observers, generated a feeling of deep foreboding about our collective futures all over the world. Do these events represent simply the normal ebb and flow of political possibilities, or do they instead portend a more permanent move away from constitutional democracy that had been thought triumphant after the demise of the Soviet Union in 1989? *Constitutional Democracy in Crisis?* addresses these questions head-on: Are the forces weakening constitutional democracy around the world general or nation-specific? Why have some major democracies seemingly not experienced these problems? How can we as scholars and citizens think clearly about the ideas of constitutional crisis or constitutional degeneration? What are the impacts of forces such as globalization, immigration, income inequality, populism, nationalism, religious sectarianism? Bringing together leading scholars to engage critically with the crises facing constitutional democracies in the 21st century, these essays diagnose the causes of the present afflictions in regimes, regions, and across the globe, believing at this stage that diagnosis is of central importance - as Abraham Lincoln said in his House Divided speech, If we could first know where we are, and whither we are tending, we could then better judge what to do, and how to do it.

Strengthening OLAF, the European Anti-Fraud Office Great Britain. Parliament. House of Lords. European Union Committee,2004 OLAF (the European Anti-Fraud Office) was established by the Commission in 1999, following the collapse of its predecessor UCLAF, and its role is to protect the financial interests of the EU and to fight fraud and corruption within the EU's institutions or within individual EU member states. Its efficiency and effectiveness are currently under review, and the Commission has brought forward a proposal designed to improve OLAF's operational efficiency, improve information flows and protect the rights of individuals under investigation. The Committee's report judges that this proposal is premature and unlikely to enhance OLAF's accountability or independence. It also notes that the future of OLAF has become entwined with the debate over the post of European Public Prosecutor, and that the Commission should not allow this to distract its focus from examining how OLAF can be made more effective in the fight against fraud.
