Eager to Learn National Research Council, Commission on Behavioral and Social Sciences and Education, Committee on Early Childhood Pedagogy, 2001-01-22 Clearly babies come into the world remarkably receptive to its wonders. Their alertness to sights, sounds, and even abstract concepts makes them inquisitive explorers and learners every waking minute. Well before formal schooling begins, children's early experiences lay the foundations for their later social behavior, emotional regulation, and literacy. Yet, for a variety of reasons, far too little attention is given to the quality of these crucial years. Outmoded theories, outdated facts, and undersized budgets all play a part in the uneven quality of early childhood programs throughout our country. What will it take to provide better early education and care for our children between the ages of two and five? *Eager to Learn* explores this crucial question, synthesizing the newest research findings on how young children learn and the impact of early learning. Key discoveries in how young children learn are reviewed in language accessible to parents as well as educators: findings about the interplay of biology and environment, variations in learning among individuals and children from different social and economic groups, and the importance of health, safety, nutrition and interpersonal warmth to early learning. Perhaps most significant, the book documents how very early in life learning really begins. Valuable conclusions and recommendations are presented in the areas of the teacher-child relationship, the organization and content of curriculum, meeting the needs of those children most at risk of school failure, teacher preparation, assessment of teaching and learning, and more. The book discusses: Evidence for competing theories, models, and approaches in the field and a hard look at some day-to-day practices and activities generally used in preschool. The role of the teacher, the importance of peer interactions, and other relationships in the child's life. Learning needs of minority children, children with disabilities, and other special groups. Approaches to assessing young children's learning for the purposes of policy decisions, diagnosis of educational difficulties, and instructional planning. Preparation and continuing development of teachers. *Eager to Learn* presents a comprehensive, coherent picture of early childhood learning, along with

a clear path toward improving this important stage of life for all children.

Madonna Confessions Guy Oseary, 2008-10-07 In conjunction with this summer's most talked about concert, Madonna's highly anticipated Sticky and Sweet Tour, powerHouse Books will release Madonna Confessions, the official book of quintessential images taken by über-manager Guy Oseary during the course of over 50 performances around the world during the Material Girl's sold out 2006 Confessions Tour. With over 250 never-before-seen images, the book showcases various provocative themes from that show including an iconographic equestrian opening to an urban Bedouin segment and on to glam punk and disco fever. The photographs celebrate what the New York Times called the sheer spectacularity of her physical form along with show stopping highlights and groundbreaking staging. Oseary, who is also Madonna's manager and has worked with her for the past twenty years, traveled with the artist and was given unprecedented access to each performance. As a result, the photographs in Madonna Confessions capture the essence, sheer energy, and excitement that came alive onstage every night. The photographs were each lovingly handpicked by Oseary and Madonna and are interspersed with quotes from Madonna. Long considered one of the most exciting live performers of our era, Madonna Confessions is a visual delight that highlights the multi-Grammy winner and Rock and Roll Hall of Fame inductee's astounding career. powerHouse is delighted to collaborate with one of the world's greatest live performers; Guy Oseary's exclusive access to each night's Confessions show allowed him the opportunity to capture unparalleled iconic moments in live performance photography. The intimacy and the sweep of the work put you front row center of an incredible experience. - Daniel Power, CEO of powerHouse Books.

Air Pollution and Citizen Awareness Daniela Simioni, 2004 Air pollution has become a key problem of daily life in large cities. This publication sets out the results of a project conducted during 2000-2002 to study the management of air pollution in three Latin American cities of Mexico City, Sao Paulo and Santiago. The project focused on the awareness and participation of the inhabitants of the affected cities about the problem and the importance of citizen involvement for the development of effective policy strategies and mechanisms for air pollution control.

Daphne's Dive Quiara Alegría Hudes, 2017-09-29 In a tucked away corner of North Philly, six regulars gather at a neighborhood watering hole. Over twenty years, they turn their collective memories into a vivacious mythology. The tales they'd rather forget, however, keep sneaking up and tapping them on the shoulder. At Daphne's Dive, an aloe plant, a girl's sneaker, a stiff drink, and mounds of trash become talismanic treasures to a group of outsiders trying to be "in" together.

The Image of the City Kevin Lynch, 1964-06-15 The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and

Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the city dweller will all want to read this book.

Climates and Weather Explained Bart Geerts, Edward Linacre, 2002-03-11 *Climates and Weather Explained* is a comprehensive introduction to the study of the atmosphere integrating climatology and meteorology. Clear explanations of basic principles, concepts and processes are supported by a wealth of highly informative illustrations and a vast array of case studies demonstrating the relevance of weather and climate to everyday life. Focusing particularly on the Southern hemisphere the authors provide fresh insights into topical environmental concerns from global warming and natural hazards to sustainable global population. The textbook is supplemented by a unique interactive Student downloadable resources containing entirely additional material, for practical work and more advanced study. Closely related to each chapter of the book, the Student downloadable resources features: * Over 170 extra 'Notes', 40 illustrations and tables. * Multiple choice, self-assessment and practical exercises. * Extended glossary and key word searching * Hypertext presentation and extensive cross-referencing * A gallery of meteorological photographs in full colour A special Instructors' Resource Pack is also available.

Upside Down Eduardo Galeano, 2014-05-13 From the winner of the first Lannan Prize for Cultural Freedom, a bitingly funny, kaleidoscopic vision of the first world through the eyes of the third Eduardo Galeano, author of the incomparable *Memory of Fire* Trilogy, combines a novelist's intensity, a poet's lyricism, a journalist's fearlessness, and the strong judgments of an engaged historian. Now his talents are richly displayed in *Upside Down*, an eloquent, passionate, sometimes hilarious exposé of our first-world privileges and assumptions. In a series of lesson plans and a program of study about our beleaguered planet, Galeano takes the reader on a wild trip through the global looking glass. From a master class in *The Impunity of Power* to a seminar on *The Sacred Car*--with tips along the way on *How to Resist Useless Vices* and a declaration of *The Right to Rave*--he surveys a world unevenly divided between abundance and deprivation, carnival and torture, power and helplessness. We have accepted a reality we should reject, Galeano teaches us, one where machines are more precious than humans, people are hungry, poverty kills, and children toil from dark to dark. A work of fire and charm, *Upside Down* makes us see the world anew and even glimpse how it might be set right. Galeano's outrage is tempered by intelligence, an ineradicable sense of humor, and hope. -Los Angeles Times, front page

Reinventing the Left in the Global South Richard Sandbrook, 2014-08-07 A fresh appraisal of the nature and significance of the democratic left in the Global South.

From Neurons to Neighborhoods National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on Integrating the Science of Early Childhood Development, 2000-11-13 How we raise young children is

one of today's most highly personalized and sharply politicized issues, in part because each of us can claim some level of expertise. The debate has intensified as discoveries about our development-in the womb and in the first months and years- have reached the popular media. How can we use our burgeoning knowledge to assure the well-being of all young children, for their own sake as well as for the sake of our nation? Drawing from new findings, this book presents important conclusions about nature-versus-nurture, the impact of being born into a working family, the effect of politics on programs for children, the costs and benefits of intervention, and other issues. The committee issues a series of challenges to decision makers regarding the quality of child care, issues of racial and ethnic diversity, the integration of children's cognitive and emotional development, and more. Authoritative yet accessible, *From Neurons to Neighborhoods* presents the evidence about brain wiring and how kids learn to speak, think, and regulate their behavior. It examines the effect of the climate-family, child care, community-within which the child grows.

Introduction to Documentary, Second Edition Bill Nichols,2010-12-07 This new edition of Bill Nichols's bestselling text provides an up-to-date introduction to the most important issues in documentary history and criticism. Designed for students in any field that makes use of visual evidence and persuasive strategies, *Introduction to Documentary* identifies the distinguishing qualities of documentary and teaches the viewer how to read documentary film. Each chapter takes up a discrete question, from How did documentary filmmaking get started? to Why are ethical issues central to documentary filmmaking? Carefully revised to take account of new work and trends, this volume includes information on more than 100 documentaries released since the first edition, an expanded treatment of the six documentary modes, new still images, and a greatly expanded list of distributors.

A History of Women in the West Georges Duby,1992 Discusses the legal, social, and religious position of women in the Greco-Roman world, Middle Ages, Renaissance, Industrial Revolution, and modern era.

The New Positioning: The Latest on the World's #1 Business Strategy Jack Trout,1997-05-22 In the same right-to-the-point, no-nonsense style that was a hallmark of Positioning, this sequel squares off against critical marketing challenges such as how to make sure your message gets through in an era of information overload.

Barrio Rhythm Steven Joseph Loza,1993 The hit movie *La Bamba* (based on the life of Richie Valens), the versatile singer Linda Ronstadt, and the popular rock group Los Lobos all have roots in the dynamic music of the Mexican-American community in East Los Angeles. With the recent Eastside Renaissance in the area, barrio music has taken on symbolic power

throughout the Southwest, yet its story has remained undocumented and virtually untold. In *Barrio Rhythm*, Steven Loza brings this hidden history to life, demonstrating the music's essential role in the cultural development of East Los Angeles and its influence on mainstream popular culture. Drawing from oral histories and other primary sources, as well as from appropriate representative songs, Loza provides a historical overview of the music from the nineteenth century to the present and offers in-depth profiles of nine Mexican-American artists, groups, and entrepreneurs in Southern California from the post-World War II era to the present. His interviews with many of today's most influential barrio musicians, including members of Los Lobos, Eddie Cano, Lalo Guerrero, and Willie chronicle the cultural forces active in this complex urban community.

The Making of Law William Suarez-Potts, 2012-09-26 Despite Porfirio Díaz's authoritarian rule (1877-1911) and the fifteen years of violent conflict typifying much of Mexican politics after 1917, law and judicial decision-making were important for the country's political and economic organization. Influenced by French theories of jurisprudence in addition to domestic events, progressive Mexican legal thinkers concluded that the liberal view of law—as existing primarily to guarantee the rights of individuals and of private property—was inadequate for solving the social question; the aim of the legal regime should instead be one of harmoniously regulating relations between interdependent groups of social actors. This book argues that the federal judiciary's adjudication of labor disputes and its elaboration of new legal principles played a significant part in the evolution of Mexican labor law and the nation's political and social compact. Indeed, this conclusion might seem paradoxical in a country with a civil law tradition, weak judiciary, authoritarian government, and endemic corruption. Suarez-Potts shows how and why judge-made law mattered, and why contemporaries paid close attention to the rulings of Supreme Court justices in labor cases as the nation's system of industrial relations was established.

Agroecology Stephen R. Gliessman, Eric Engles, Robin Krieger, 1998 Presents powerful arguments against Environmental Racism, Incrementalism and the Impotence of Planning. Explores case studies of urban planning, county policies, residential development and more. Submits the authors recommendations for preserving the delicate balance of Floridas ecosystem.

World Anthropologies Gustavo Lins Ribeiro, Arturo Escobar, 2020-07-13 Since its inception, anthropology's authority has been based on the assumption that it is a unified discipline emanating from the West. In an age of heightened globalization, anthropologists have failed to discuss consistently the current status of their practice and its mutations across the globe. *World Anthropologies* is the first book to provoke this conversation from various regions of the world in order to assess the diversity of relations between regional or national anthropologies and a contested, power-laden Western discourse. Can a planetary anthropology cope with both the 'provincial cosmopolitanism' of alternative anthropologies and the 'metropolitan provincialism' of hegemonic schools? How might the resulting 'world anthropologies' challenge the current panorama in which certain allegedly national anthropological traditions have more paradigmatic weight - and hence more power - than

others? Critically examining the international dissemination of anthropology within and across national power fields, contributors address these questions and provide the outline for a veritable world anthropologies project.
